Open PhD Positions

At the Institute for Information Systems Engineering, Vienna University of Technology, Vienna, Austria, PhD positions are available. We are looking for a person with a Dipl.-Ing. or MSc. in computer science, mathematics, or software & information engineering with background in one (or more) following fields: software engineering, systems science, distributed systems, virtualized HPC systems, systems monitoring and dependency. The candidate should already have

- demonstrated a strong work commitment and ability for independent work but also as a team player
- strong interpersonal and communication skills

Our working language is English and there is no need to learn German, although we will encourage and support any German-learning ambitions. There are no teaching duties, unless they are desired. Teaching duties are paid extra.

The positions are offered within the FWF START Grant “*Rucon – Runtime Control in Multi-Clouds*” and “*InTraSafEd 5G – Increasing Traffic Safety with Edge and 5G*”, financed by FWF and the City of Vienna.

More information about the Rucon project: <http://rucon.ec.tuwien.ac.at/>

We offer an excellent working environment in a highly-motivated team with various expertise, competencies, research backgrounds and career stages.

Salary: standard personnel salaries for FWF project staff (30h per week) € 2.024,90 gross (14 × per annum).

Review of applications will continue until the positions are filled. Starting is possible at any time.

Applications including a curriculum vitae, motivation letter with a research statement, two letters of recommendation, should be sent electronically to:
